

Success Stories

Supporting Accelerated Start-Up Growth

Critical Business Challenge

A start up company needed complete set up and management of: End User services, End User Licensing, Messaging, VOIP, Network, Open Systems, Storage, Production job control, COLO, Disaster Recovery, Security Services , managed assets, SharePoint services and Hybrid Cloud Support services. Program management and services of Initial setup

Actively Managing Full IT Service Suite

Partnership

Partnered with Start-up New Co to set up infrastructure and hosting of applications as managed services, scaling our operations to the growth of the company. Provided application support services for the Guidewire Platform and Data/Analytics groups.

Solution

- Managed the entire program from discovery, planning, execution and separation of infrastructure and assets from one entity into 3
- Set up infrastructure and application hosting
- Separation of infrastructure & hosting for each of the 3 entities
- Continued providing managed services for Infrastructure hosting, Cybersecurity, Public Cloud (AWS) support and Hybrid cloud services; Provided application development services for the Data and Analytics team.
- Managed the initiative of scale-down and decommission of infrastructure and assets to run-off state; and currently providing the infrastructure and hosting services for the run-off operations.
