Success Stories

Map, Transform, Deliver: The Blueprint for Streamlined Data Management for Carrier

Critical Business Challenge

Our client required to identify the tasks of interfacing the Commercial Auto and Package data including all Issues, Renewals, Endorsements, Cancellations, Reinstatements & Final Audits through the Carrier Data format.

Partnership

Our expert team worked closely with the MGA and Carrier to map data to create interface solutions. The applications provided the transformed data to provide a daily feed to the Carrier repository with the flexibility to deliver and receive multiple feeds in a single day via secured transport protocol.

Solution

- Data Mapping, transformation and daily feed system is setup in 6 weeks

- Significant operational savings are generated

- Pay-per-use model

- Balanced error free data send to Carrier

- Created automated hand-shake between MGA and Carrier

- The Client is receiving benefits of the pay-per-use economic model without CAPEX burden
